TOTAL SCORE									

Score verification table

TOTAL SCORE	OBSERVATIONS
Between 241 and 360 points	In the end what matters is the footprint we leave, so you can feel happy because the green colour predominates in your footprint.
Between 121 and 240 points	If you have obtained this score, one option is that you may have found the tests difficult, but the colour green predominates in your footprint, which means that you have to catch up with maths, but also that there is good news for you about your sustainable habits. However, if you got this score because you played smart and fast, but the green colour does not predominate in your footprint, this is not good news and maybe it is time to adopt more sustainable habits, don't you think?
Between 0 and 120 points	Something is wrong. It seems that you have lost the way and that your footprint is not close to green.... This is not a good result, what if you try again?
